It is simple and plain in its construction; can be taken to pieces or put together by any ordinary man, black or white, in ha if a minute. There is not a screw or bolt about the pump; there is the least imaginable friction—bence its durability. It is almost impossible for it to get out of fix by usage.

When used for a wall or clutern it can be converted into a Fire Engine in one minute, and by one man water can be thrown over the tolless bouses in the country. It is invaluable as a Fire Engine, and especially in the country or country towns.

It is equally well adapted to all machinery, Railroad Tanks, &c., and will, when known, superscode all other pumps. It can be used for either hot or sold water.

Having fully satisfied ourselves as to the capacity, value and utility of the Fump, we are ready to make sales of the above territory by counties or States, (except the Western District of this State, which has been said.) We confidently recommend the Pump to the citizens of the States mentioned.

The Pumps are cheap, and therefore within the reach of every family.
